*setting. Comprehensive coverage of medical terminology creates a distinction between terms built from word parts, which are usually based on Greek or Latin, and those terms NOT built from word parts, which are based on eponyms, acronyms, or terms from modern language. Systematic presentation provides a foundation of word parts (prefix, suffix, word root, and combining vowel), then builds words by combining the parts. Case studies ask students to interpret medical terms used in medical records and to translate everyday language into medical language. Full-color illustrations encourage students to apply the meaning of word parts by labeling anatomical figures.
